

The electrical efficiency
in your hands

Portable network and quality supply analyzer.

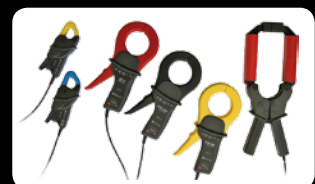

- 10 inputs for measurement (5 for voltage and 5 for current).
- 128 samples by cycle by each channel in class 0,5.
- High-resolution color screen of 5,7" which allows high resolution graphical representations of waveforms, phasors diagram or harmonic decomposition.
- Transients and power quality network recording according to EN 50160 in class B according IEC 61000-4-30.
- Fully customized for all internal and external features, identifying phases colors according to requirements or regulations.
- Memory optimization bay device programming periods and/or special conditions for registration.
- Compatible with new flexible clamps, built-in amplifier, **AM54-FLEX** and **AMS14-FLEX**.
